## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 18-24 and 26-34 allowed.

The following is an examiner's statement of reasons for allowance:

US 6,363,421 by Barker et al, teaches about the remote management of a telecommunication network in which the software is designed to accommodate future changes in the network. In Baker, an object class code in combination with an instance identifier was used to accommodate network changes. The instance identifier in Barker is a static value (Col 14, lines 35-49). In applicant invention network changes are accommodated by an identifier, which can be modified (allomorph class) to reflex network changes (Specification Page 9, line 10 – Page 10, line 25). Prior art failed to teach this feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
